

ENGINEERING & HYDRAULICS PTY LTD

If it's made of steel, we can fix it!

Core Capabilities

- Machining—both manual and CNC. Experienced in heavy engineering and precision component manufacture and repair.
- Thermal Arc Spraying—dimensioned restoration of worn components in our purpose built spray room with a vertical rotary table and horizontal rotator.
- Hydraulic Cylinder Repairs—overhaul and manufacture of complete cylinders and components in our dedicated hydraulics workshop. All machining, assembly and testing is conducted in-house to ensure quality control of the finished product.
- Welding and Fabrication—equipment reclamation/repairs and general fabrication. Experienced boilermakers using permanent and portable welding equipment including; MIG Welders, SubArc Welders, TIG Welders and Stick Welding.
- Sandblasting and Painting—steel shot blast chamber and wide range of enamel paints all completed in-house in our purpose built sandblast chamber and paint booth.

Our Discriminators

- Performance—long-term relationships with customers, great reputation for completing challenging jobs
- Strengths—proven experience meeting strict deadlines, quality workmanship and years of experience
- Capacity—capacity to work around the clock to complete jobs
- Track Record—15year track record in breakdown engineering services and completion of high-value jobs
- Value Adding—after hours breakdown service, pickup and delivery available
- Staffing—workforce of 21 with vast experience in the metal trades environment
- Skills—qualified Fitter Machinists and Boilermakers with specialty fields in Thermal Arc Spraying and Hydraulics. Continual upskilling and regular training in quality, safety and environmental systems
- Continuous Improvement—committed to continuous improvement, problem solving and quality accredited in three ISO systems

Our Key Customers

- | | |
|--------------------------|-----------------------------------|
| • Chep | • Westrac |
| • Xylem Water Solutions | • Australian Conveyor Engineering |
| • Geared Engineering | • FLSmidth |
| • Reliable Conveyor Belt | • MLA Holdings |

I personally have found their work to be of a high standard and they constantly change their workload to meet ours. It is a credit to Ian, Michelle, Craig, Paul and all the staff at Dentons, and I will continue to send our work to them in the coming years.

David Saunders, Westrac Pty Ltd
