

Company Overview

machinemonitor® have been helping clients for over 20 years. Machinemonitor assists with the entire life cycle of your electrical engineering assets. Working with companies to change the way they think about asset management, and ensure they leverage maximum asset life of their business critical machines. Through all stages of the asset life cycle, from design & procurement, installation, testing services, operation, repair and overhaul, reliability and risk analysis, we give you the tools and knowledge to make informed decisions on your assets. machinemonitor® is independent and we align with our customer's interests to add value to their businesses by:

- Reducing maintenance and operating costs
- Reducing risk and making the workplace safer
- Reducing downtime and increasing plant availability
- Documenting, trending asset condition and preserving records
