

FULLY INTEGRATED SHEET METAL FABRICATION

Established in 1997 Kanyana Engineering is one of Western Australia's leading sheet metal fabricators specialising in component manufacture and customised solutions.

With our advanced press bakes and the addition of the 15kw Bystronic Bystar fiber laser cutter in 2021 we have remained at the forefront of the industry.

Design & Consult

We provide a value-adding design, feasibility and advisory service to ensure the optimal design of your product:

- CAD capability
- Pre-production advisory to ensure workable designs
- Custom designs
- Prototype models

Welding

Welding is performed by our first-class certified welders. Our team is capable of any fabrication from the simple to the complex.

Cutting

Precision cutting is performed using our state-of-the-art CNC high-speed laser cutting machines together with full automation for maximum productivity and minimum cost per part.

Our Bystronic fiber lasers set the benchmark in advanced computer-guided laser cutting, capable of cutting sheet metal up to 50mm in thickness.

Tracking

We use globally leading MRP software, Lantek, for product tracking and traceability. Every part is individually numbered.

Bending

Our specialised folding and bending equipment includes:

- The Bystronic Xpert Pro (3100mm) with automation processors
- The Bystronic Xact Smart (4100mm)
- The Yawei Press Brake

Delivery

We provide a coordinated freight service utilising our trusted local logistics partner, for a complete door to door service.

PROVEN CAPABILITY

ISO-Certified Management Systems

Clients

VALUE-ADDING SERVICE

 Fully **integrated** capability

 **Large-scale** capacity
4,000m² site
2,000m² workshop

 **ISO-certified** safety, environment and quality management systems

 **Latest** equipment and technology

 Coordinated **freight** service

 **Consultative, problem-solving** capability

 **Shortest** lead times in the industry

 **Competitive** pricing
