

BlueZone Group

COMPANY OVERVIEW

BlueZone Group supplies quality underwater technology and services to the Defence, Offshore Oil & Gas, Oceanographic, Hydrographic, Renewable Energy and Water Utility markets. BlueZone represents suppliers of subsea equipment including cameras, cables, connectors and many types of instruments. We provide specialised support for autonomous and remotely operated vehicles. At BlueZone, we “service what we sell” and our workshops in Newcastle and Perth provide local service and support for our full product range. Our application engineering team provides design, development and integration of products for new and existing systems.

CAPABILITY

- Supply of maritime and subsea equipment from world-leading OEMs
- Application engineering, system and product development
- Short run manufacture of complex electronic and electro-mechanical systems
- Mature supply chains and long established exclusive distribution network to support short run manufacturing
- Niche PCB design and manufacture
- Skilled electronic and electrical engineers and technicians
- SCADA, PLC and embedded software design
- Ruggedised enclosure design for harsh environment deployment of electronic systems
- Understanding and application of Defence Systems
- Mature engineering processes with proven track record
- Project Managed Organisation

21 Huntingdale Drive,
Thornton NSW, AUSTRALIA

COMPETITIVE DISCRIMINATORS

- Mature and long established supply chain
- Ideally suited for short run complex system for harsh environments
- Experienced Australian partner for OEM contracted equipment
- Mature and adaptable support capability including breakdown & planned maintenance

CERTIFICATIONS / ACCREDITATIONS

- AS/NZS ISO 9001:2015
- Defence recognised supplier
- Recognised Engineering Capability - National Engineering Excellence Award 2012
- Commitment to LEAN principles

PARTNERS & CUSTOMERS

- Thales Australia – Minehunter Coastal Ship support since 2000
- Saab – Mine Disposal System service partner since 2000
- Leidos– SEA1770 Rapid Environmental Assessment supplier
- ASC – Special Forces camera control system (COLLINS)
- ASC Shipbuilding – equipment supplier
- RAN – RON colour pan & tilt camera system (COLLINS)
- Maritime Ranges and Signature Management SPO – Wave Glider Autonomous Surface Vessel support
- L3 Communications Systems East - Landing Helicopter Dock (LHD) Communications trainer support
- Raytheon – Airwarfare Destroyer engineering studies
- Teledyne Marine – Australian distributor for 14 companies
- HII – Australian partner for REMUS
