

DECO are Australian leaders in surface technology solutions, supplying protective coatings, surface treatments and durable building products to the defence, architectural, infrastructure, commercial cookware and engineering sectors.

Annual Turnover: \$13m

Staff: 80+

Compliance:

- ISO 9001:2015 accredited
- Anodising SOPs meet MILSPEC requirements
- Accredited Cerakote applicators

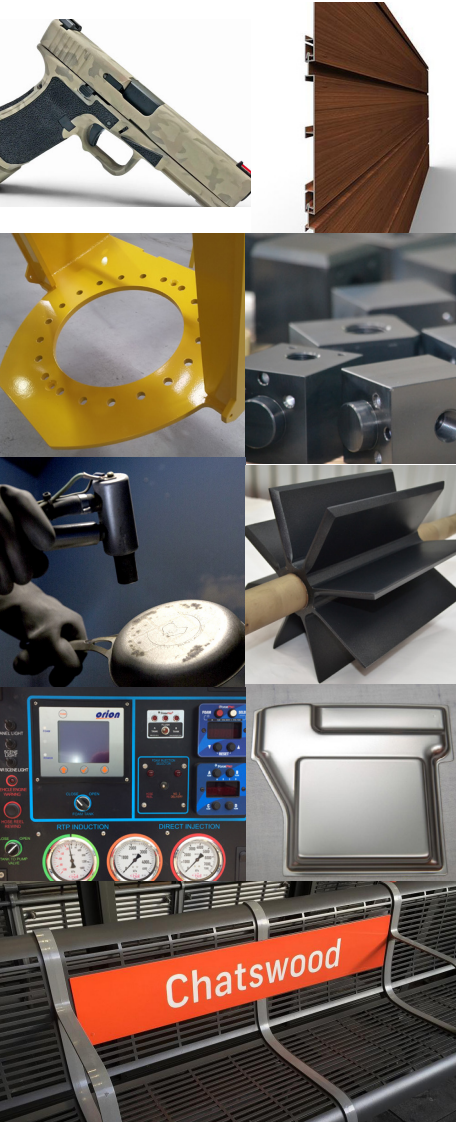

A: 67-77 Airds Road, Minto NSW 2566

P: (02) 9603 1888

E: info@deco.net.au

W: deco.net.au/protective-coatings

Industrial Business Manager:
Alasdair McIntosh (0447 464 106)

CAPABILITIES:

Pretreatment

- In-house chemical and mechanical pre-treatment systems including abrasive and glass bead blasting

Coating and Finishing/Finished Products

- Specialists in hard anodic coatings with thickness >40 microns
- Development of durable custom and specialty coating solutions
- Hanging batch line for powder coating large components
- Marine grade finishes available
- Application of high quality, durable coatings including ceramic and PTFE coatings for a variety of components
- Durable, graffiti-resistant finishes for signage applications
- Non-combustible, low-maintenance architectural products including cladding and slip-resistant external flooring systems

Quality

- In-house testing facilities and compliance testing; ISO 9001 approved Quality Management System
- ISO 9001:2015 accredited
- Anodic processes tested to and meet the performance requirements of MIL-A-8625F

PRODUCTS:

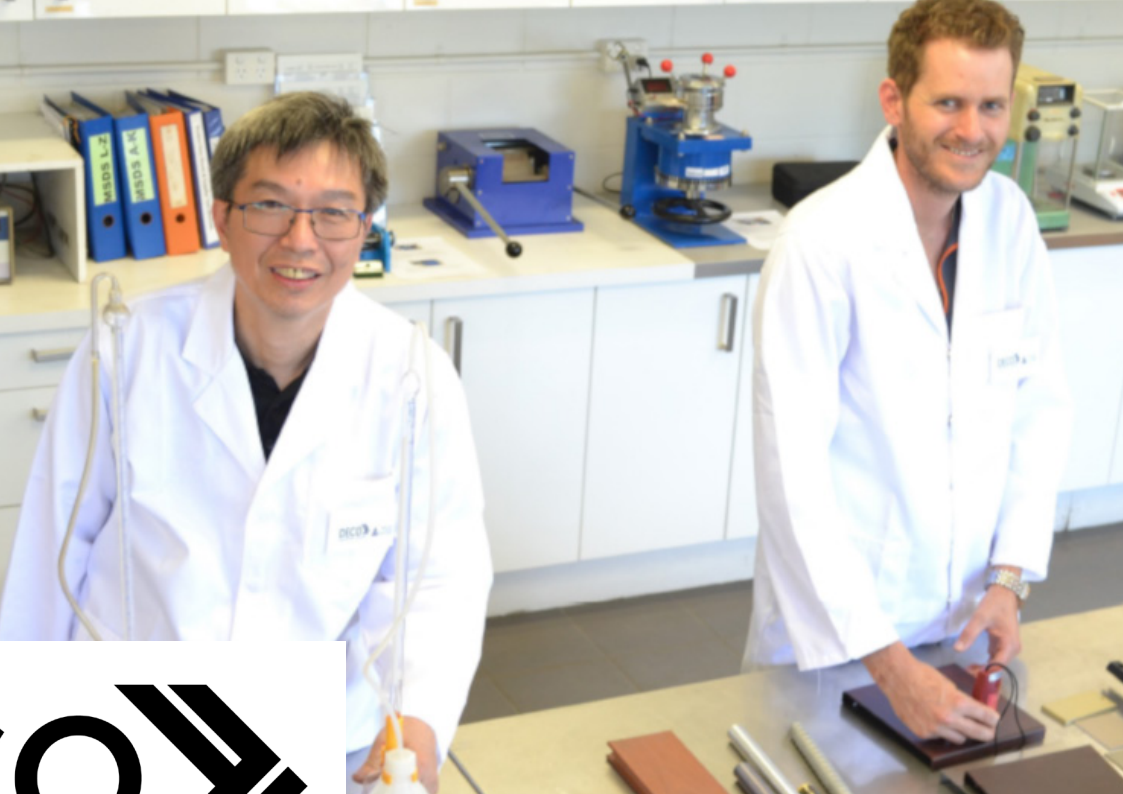

- Anodising
- Hard Anodising
- Powder Coating
- Teflon Coating
- Ceramic Coating/ Cerakote
- Thermoplastic Coating
- Zinc Flake Coating
- Duplex Coatings
- Graffiti-resistant signage
- Sublimated/photo imaged finishes
- Fire-safe cladding
- Slip-resistant powder coated aluminium external flooring system
- Dry abrasive blasting
- Slurry peening/wet blasting
- E-Coating
- Coil Coating
- Mass finishing
- Custom coatings to suit specialised applications

DISCRIMINATORS:

- The only commercial hard anodiser in NSW and one of the few commercial hard anodisers in Australia
- Complete in-house coating systems including pre-treatment and quality testing systems
- Developers of Duplex coatings, combining the benefits of multiple coating technologies for specialised projects
- Specialists in the development of custom coatings unique to purpose
- Specialists in the use of sublimation/photo imaging technology to create durable signage and custom/branded components
- All coatings tested to ensure durability, corrosion resistance, chemical resistance and coating integrity
- Processes tested to MIL SPEC requirements; compliant with Qualicoat requirements
- Cerakote accredited applicator; MIL SPEC colours available
- FDA approved Dupont PTFE and PFA coatings available
- Market leaders in corrosion resistant, fire safe architectural products suitable for areas with extreme weather conditions
- Effective continuous improvement system implemented and practised
- Fast turnaround times
