

Company Overview

Robotic Systems is an engineering consultancy, designing and manufacturing specialised robotics and equipment for industrial applications.

Capabilities, Certifications & Accreditations

- Rapid prototyping facility
- CNC
- Waterjet
- PCB Assembly
- PCB Reflow
- 3D Printers
- Advanced electronics test and measurement.
- Radio Frequency test and measurement
- Cable assembly

Competitive Discriminators

Robotic Systems offer a complete idea-to-product pipeline, thanks to our talented team of in-house Product Designers, Programmers, Engineers, and Production Technicians.

Additionally, we operate on a customer-owned IP model- all products we design and produce are the full intellectual property of the customer.
